## PREFACE

This volume contains selected and refereed papers on survey methodology from two international conferences: on Applied Statistics held in Preddvor from September 15 to 17, 1997, and on Methodology and Statistics held in Preddvor from September 7 to 9, 1998. The papers on applied statistics presented at these conferences are published in another issue of the series *Metodološki zvezki* (16). The conferences were organized under the sponsorship of the Statistical Society of Slovenia. The contributions to this volume are clustered into three sections. The invited lecture by James M. Lepkowski, Vivian Siu, and Justin Fisher is followed by the section on reliability and validity and the section on costs, errors, and survey modes.

We are grateful to all authors for their contributions and to all colleagues who reviewed the papers for this volume. Gratefully acknowledged is the help and support of the Faculty of Social Sciences, the Central Statistical Office and the Ministry of Science and Technology of the Republic of Slovenia.
